

connect webmail to mac mail on os-x.

How to connect your Webmail account to Mac Mail on OS-X.

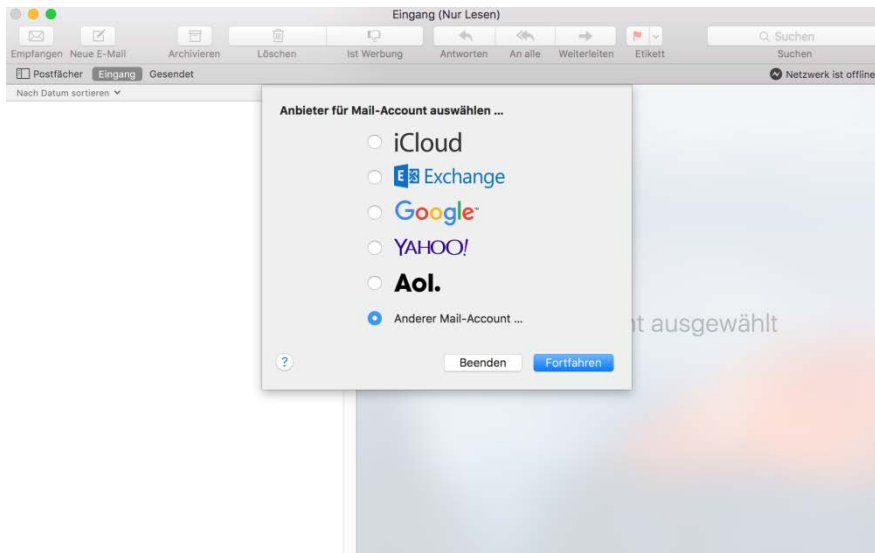

IT Services

1. Open Mac Mail:

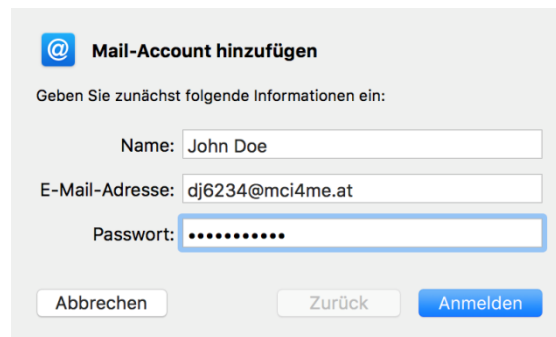

- a. If you have already set up an email account, go to **Mail** and click **Add Account** to create an additional account.

- b. If you haven't already set up your email account, choose your email provider first when you open Mail.

- 2. Select **Add Other Mail Account**, then click **Continue**.
- 3. Enter your account information in the respective boxes and click **Create** to confirm.

- 4. Fill in the server settings for your email account.

E-Mail-Adresse:	<input type="text" value="dj6234@mci4me.at"/>
Benutzername:	<input type="text" value="Automatisch"/>
Passwort:	<input type="password" value="....."/>
Accounttyp:	<input type="text" value="IMAP"/> 
Server für eintreffende E-Mails:	<input type="text" value="mail.mci4me.at"/>
Server für ausgehende E-Mails:	<input type="text" value="mail.mci4me.at"/>

Remember to choose the following settings:

- Account Type: IMAP
 - Incoming Mail Server: mail.mci4me.at
 - Outgoing Mail Server: mail.mci4me.at
5. Click **Create** to have your settings verified. In case of an error, please check your account information. If all the information is correct, your mci4me account has been successfully connected to Mac Mail.
