

## apple mac os x.

### PREREQUISITES FOR SETTING UP EDUROAM ON APPLE MAC OS X

- mobile device running mac with a network interface card/WiFi
- WiFi - switch  is activated
- you are within range of a MCI access point

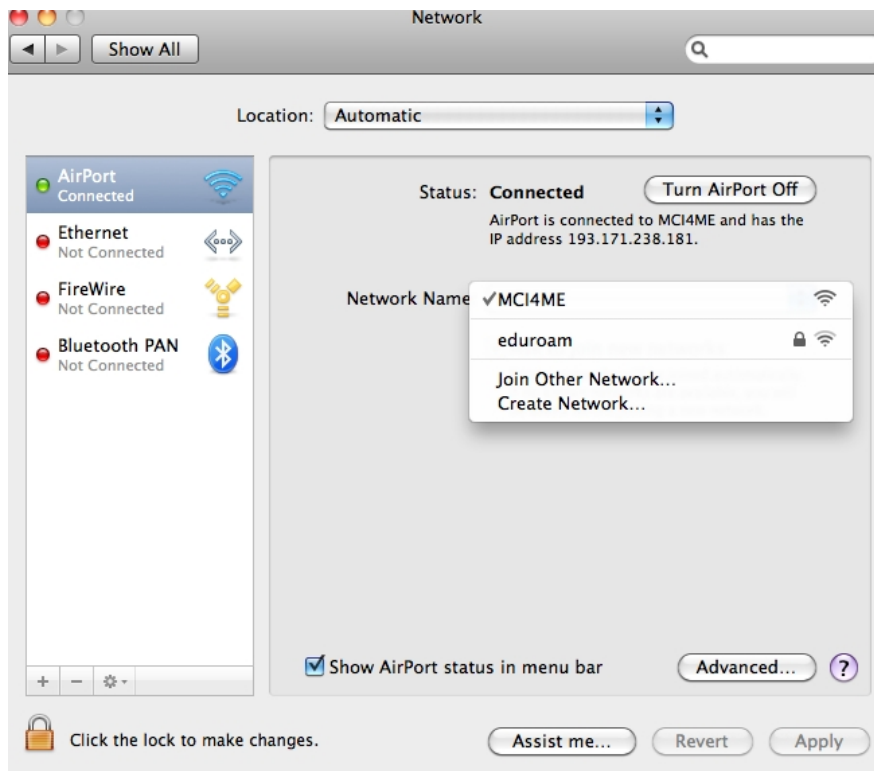

### CONFIGURATON OF CONNECTION AT FIRST TIME USAGE

- Open the Airport-Symbol  in the menu or if it isn't shown automatically, select Apple -> system preferences -> Internet & Wireless -> Network -> as shown below:

- select "AirPort Connected "

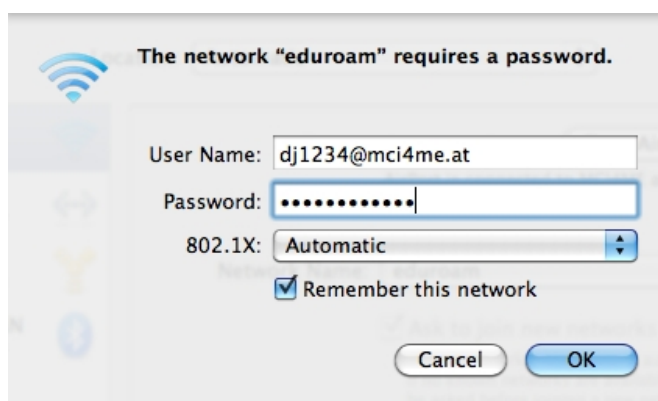

- select "eduroam" as Network Name:

- open „eduroam“

- to type in your credentials:

- **Students:** type your **user-ID** (e.g. dj1234@mci4me.at) and your **password**. Please note: if you never changed your default password to a new password (or changed your password on or before June 20th, 2010) change it on <https://my.mci4me.at>.
- **MCI staff:** type your user-ID (e.g. jed@mci4me.at) and your password. You can change or reset your password on <https://my.mci4me.at>.
- **Visitors:** Please type your user & password from your MCI WLAN-Voucher.

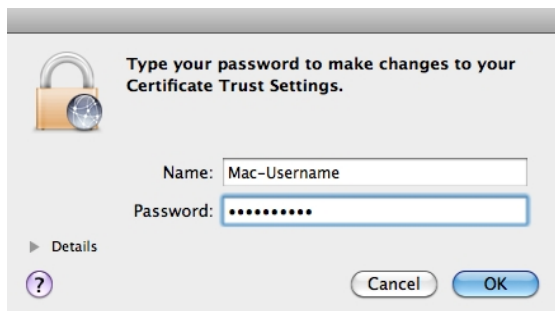

- "802.1X": "automatic"
- Click the **OK** - button.

Congratulations, you are now connected to the internet via eduroam.

Some devices may ask you for authentication or server's certificates:

- Select "continue" please provide your Apple-credentials...

...to save all settings.

To connect manually, please

- open the Airport-Symbol  and choose "eduroam"
